VOTIVA IS A PROCEDURE BASED ON FDA CLEARED TECHNOLOGIES

"It's been two weeks now that I've had Votiva done, and I can see a noticeable improvement across the board. I'm really excited about the results thus far."

- KELLY | AGE 56

WHAT IS VOTIVA?

Votiva with FormaV is a therapeutic device for the treatment of sexual dysfunction or as an adjunct to Kegel exercises (tightening of the muscles of the pelvic floor to increase muscle tone). Votiva with Morpheus8, is a fractional treatment promoting tissue remodeling. Aviva, powered by AccuTite, is a minimally invasive procedure to restore the function and appearance of the vulva by offering a non-excisional alternative to a labiaplasty.

HOW DOES VOTIVA WORK?

Votiva uses up to three complimentary technologies to address your specific health and wellness concerns. Votiva with the FormaV handpiece, gently and uniformly heats the treated tissue, reducing pain and tightening the pelvic floor muscles. Votiva with the Morpheus8 handpiece is a fractional treatment that remodels tissue. Votiva's Aviva technology is a minimally invasive procedure that delivers radiofrequency energy to remodel the appearance of the vulva.

Your physician will speak to you regarding your concerns and expectations. At this time, they will develop a tailored treatment plan for your individual needs.

WHAT CAN I EXPECT?

During a treatment, a small wand is applied to the problem area, and delivers safe and effective heat.

HOW MANY SESSIONS ARE RECOMMENDED?

Your physician will determine the best course of therapy for you. Most patients undergo between 1-3 sessions.

Ask your physician if Votiva is right for you.
